

Johns Manville Now a Stocking Distributor of TruGround® Conductive Primer

FOR IMMEDIATE RELEASE

November 21, 2025

BELLINGHAM, Washington – Detec Systems is excited to announce a stocking distributor partnership with Johns Manville. TruGround® Conductive Primer will now be incorporated into Johns Manville’s JM Peak Advantage Guarantees. The addition of TruGround enables JM assemblies to incorporate Electronic Leak Detection (ELD) testing into their existing maintenance program through the JM Guarantee.

Available in 5-gallon buckets, TruGround is designed for installation directly below the membrane. The primer must be used in addition to the membrane adhesives and is not intended to replace the adhesive in the roofing assembly.

TruGround has been tested and certified by both Factory Mutual (FM) and Underwriters Laboratories (UL). Approved use in roof assemblies can be found in RoofNav, UL Evaluation Reports, and the Florida Building Code.

To be eligible for the JM Guarantee, TruGround must be purchased through Johns Manville. Leak detection testing services must be coordinated through Detec Systems or a Detec-certified ELD testing agency.

More information on TruGround Conductive Primer can be found at www.detecsystems.com

To purchase TruGround under the JM Peak Advantage Guarantee, please contact your local Johns Manville sales representative.

About Detec Systems

Detec Systems provides industry-leading technology in Electronic Leak Detection (ELD) quality control testing and continuous moisture monitoring for roofing and building envelopes. Detec Systems provides unparalleled risk mitigation and is committed to improving the sustainability of buildings through advanced moisture intrusion technology. Detec offers a level of quality assurance and peace of mind that remains unequaled in today’s ELD industry.

About Johns Manville

Johns Manville (JM), a Berkshire Hathaway company (NYSE: BRK.A, BRK.B), is a leading manufacturer and marketer of premium-quality products for building insulation, mechanical insulation, industrial insulation, commercial roofing and roof insulation, as well as fibers and nonwovens for commercial, industrial and residential applications. In business since 1858, the Denver-based company has annual sales of over \$4 billion and holds leadership positions in all of its key markets. JM employs nearly 8,000 people and operates in 42 North American and European locations. Additional information can be found at www.jm.com.
